Customer Success Story

Oriental Maritime is moving to the cloud and benefits from the Akereon email services for shipping.

Oriental Maritime LLC is a Dubai based shipping company, which have been involved in Chartering worldwide since 2005 with staff profile of a wealthy experience and professionalism. After long years of success Oriental Maritime LLC have grown substantially to become a leading exponent of the Global Shipbroking industry and is extending their activities to continue the challenge and fulfilment with the clients. Oriental Maritime LLC main activity is conducting business between the companies and their trading partners through our chartering departments such as, Tanker Chartering, Dry Cargo Period Chartering and Ship Sale & Purchase.

Oriental Maritime is using akéreon cloud services for their email and company applications, to protect critical data and upgrade the user experience for computing and support.

"Cooperating with **akéreon** is in fact a very good experience. The **akéreon** team helped us a lot, reacted on the spot for any problem we face and got it solved in just no time. Generally, **akéreon** services relieved our minds from servers and spam problems." Says Mr. Mohamed Hosny, Chief Executive Officer of Oriental Maritime.

Akéreon Services used by Oriental Maritime:
- **Antispam and antivirus for shipping**
  Email protection service dedicated to shipping; Filters all spam and malicious messages and makes sure that you will not miss any useful messages i.e. from shipping companies.
- **Domain and email hosting**
  Rich email functionally including Web-Mail, auto-forwarding, auto-reply and email filtering; ability to reach your emails from any email platform or device.

- **Outgoing Email for shipping**

  The managed email service takes care that all your emails reach their destination, not marked as spam or end up as undelivered messages. The offered service is a dedicated professional email service for shipping companies, with no restrictions, regarding all your outgoing email needs whether to a small number of recipients or circulars with thousands of recipients per day.

- **Cloud Hosting Services**

  It provides data center resources on demand. There is no need to invest on ICT infrastructure. Adjust easily and rapidly your computing power requirements according to your needs.
