

Customer Success Story
**Alma Shipmanagement trusted akéreon
to secure their IT systems and functions
and a high quality of IT Support and email hosting services**

SHIPMANAGEMENT & TRADING S.A.

Alma Shipmanagement & Trading S.A is managing a fleet of 6 Handysize vessels and has the ambition, capacity and competence to further expand depending on market conditions.

Alma Shipmanagement & Trading S.A is a privately owned company, established in 2012 and is engaged in ship management and the worldwide seaborne transportation of dry bulk raw materials and commodities. At the present, Alma Shipmanagement &

Alma Shipmanagement & Trading S.A. is using akéreon IT Support Services and maritime email hosting services to send and receive several hundred messages per day.

The management of Alma Shipmanagement & Trading S.A stated "We trusted akéreon to secure our IT systems and functions and we enjoy high-quality business support which enable us to concentrate on our core business of shipping."

Akéreon Services used by Alma Shipmanagement and Trading S.A.:

- **Domain and email hosting**
Rich email functionality including Web-Mail, auto-forwarding, auto-reply and email filtering; ability to reach your emails from any email platform or device.
- **Antispam and antivirus for shipping**
Email protection service dedicated to shipping; Filters all spam and malicious messages and makes sure that you will not miss any useful messages i.e. from shipping companies.
- **Akereon IT Support Services**

akéreon support services establish a proactive and trouble-free information technology environment that will allow users to focus on their business. I.T. support for users includes dealing with potential problems and the best way to use technology in your business. The cost of IT support services is fixed and depends only on the number of the users in your company; costs do not increase along with the time spent for supporting the IT infrastructure of your company. The akéreon support team is engaged to provide high quality support services to maritime companies, offering several ways of communicating with the end users, providing a wide spectrum of solutions for potential issues raised and adding value to the business of the final customers by ensuring problem free IT, every single day.
